

Noah's Flood

Introduction

Noah's Flood would be one of the most unbelievably biblical events in the history of the world and is one of the primary causes of faith loss in the Word of God.

The topic has not been dealt with appropriately or in a timely manner by the convocations to address this major issue and has created a vacuum into which distrust and disbelief has gushed in.

This article brings together the Genesis script and references to recent scientific discoveries to present a plausible series of events that would have easily accommodated a world flood of these proportions.
