

Why Our Governments Think Aliens Are Real

Introduction

There are perilous forces in play in the world today to convince us all that aliens are real and that they are technologically advanced and want to kill us off. This is in fact a lie perpetrated at the highest levels of our world governments who have spent multiple trillions of dollars in search for these extra-terrestrials; so one has to ask why.

This article explores the underlying anti-God basis for the whole sorry pantomime of this fiction and how our nations' leaders are being duped by Science into trying to find evidence of alien life. It identifies that stories about aliens and extra-terrestrial creatures are just a blind to camouflage not only vested interests of throwing large amounts of money at this "research", but it is challenging every Christian on the planet that God did not create the heavens and the earth and the universe.
