

# **A Revelation Treatise: Is the Time at Hand?**

This is a major work of 357 pages and covers the entire Book of Revelation. It was originally completed in 1990 and took over a year to bring it to print. Since then it has undergone revisions as further insights came into focus and because of our developing understanding of these prophetic times another review was undertaken in 2019.

These works are a comprehensive commentary study into the Book of Revelation indicating linear chapter alignments that form a continuous chronological sequence from Chapter One to the end. It was this unktion from our Lord that opened my eyes to what the details are that our He wished us to know in these times.

The subject matter is our Lord and Saviour and His Redemption Plan that he put in place to save precious souls from out of this earthy encasement and redeem them into everlasting life in heaven. It also reveals the nature of the satanic forces that are in play today that will, when the time for it is in hand, play a major role in the end times.

The time frame for the events stretch from the beginning of time to the end of time and account the various issues, some concurrent, that have contributed both good and evil from the conception of the Creation to the New Jerusalem that will come down upon the earth.

It is through these historic and prophetic details that we can spiritually see what is really going on in our world today and the direction from which certain forces are trying to destroy the souls of mankind from ever being redeemed. This is a battle of galactic proportions that puts any mere human fiction story into insignificance.

This is very real and is life changing to those who will read and understand the message that our Lord is giving us. For those who do, the world will appear much differently from beforehand and it will also re-frame the traditional view of the world's history.

The original version was the first work undertaken by the author and hence some minor editorial corrections are necessary for readers today.
