

The Redemption Plan

Introduction

When we speak or hear of the word Redemption it would be fair to say that most people would immediately bring to mind God redeeming sinful man from the face of this planet to be in heaven through the power of Salvation, as wrought through Christ our Lord on the cross at Calvary. And of course we all accept this.

But the magnitude and volume of how much detail we are missing about this subject is astonishing. For some, this will be more of a legacy of childhood memories of sermons that had been précised for young ears and for others it will be a lack of teaching other than it was just another step on the road to our salvation when we pass from this life to the next.

This large article reveals facts about God's Plan to redeem mankind from this earthy planet that are most surprising. We document a plan that was drawn up in antiquity by God and executed over billions of years. We find that our Lord and Saviour is far older than what we might have imagined and we discover a treasury of truths that have been tucked away in the scriptures waiting to be revealed.

As the author, I truly enjoyed the research and the writing of this article as it was for me a journey down an otherwise road of disjointed events lacking (on my behalf) understanding of the big picture.

I am sure readers will also gain a lot of valuable truths and like a jig-saw-puzzle; it will fill in quite a sizeable proportion of the biblical story along the way.

This is a medium sized article of 145 pages.
